### **DETAILED ACTION**

- 1) Acknowledgement is made of preliminary Amendment received 1/28/2002, Paper No. 5. Applicants cancel claims 1-19, and offer new claims 20-33, for consideration.

### ***Specification***

- 2) This application does not contain an abstract of the disclosure as required by 37 CFR 1.72(b). An abstract on a separate sheet is required.
- 3) Cross-reference to related applications should be made on page 1 of the Specification.
- 4) Figure 3 is neither referred nor identified in the detailed description section.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

- 5) Claims 20-33, are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 20, 25, are confusing as written, the claims should be rewritten in a clear and concise manner, using proper syntax.

Claims 21-24, 28, 30-32, should start with the term "The".

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6) Claims 20-22, 25-26, 33, are rejected under 35 U.S.C. 102(b) as being anticipated by Sutton (4,088,259). Sutton discloses a process and an apparatus wherein a rotating apparatus is used in the manufacture of egg cartons. A foraminous vacuum forming mold 54 is rotated into the source 52 of aqueous pulp solution. Suction is applied to deposit from the slurry a layer of wet pulp on the open face of mold 54. Mold 54 is rotated and press dried against vacuum dried and steam heated mold 56. Steam entry and exit vent in mold 56 is shown in Figure 7. The product formed in a cavity between molds 54 and 56 is then carried off by mold 56. Mold 56 is rotated and the product is then finished and stacked (col. 5, line 37 to col. 7, line 38, and Figure 7).

***Allowable Subject Matter***

7) Claims 23-24, 27-32, would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter:

The primary reason for indication of allowable subject matter is that the cited prior art does not show: a pulp molding process using a heated fluid medium, wherein the heated fluid medium is thermal oil (claims 23-23); a heated transfer die-and-pressing tool arrangement wherein a mold is equipped with a secondary fluid passage that has an entry into the mold and a vent out of the mold (claims 27-32).

***Conclusion***

8) Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mark Halpern whose telephone number is 703-305-4522. The examiner can normally be reached on Mon-Fri, (9:00-5:30).
